

PYTHON FOR WEB

Introducing Llama-2 to

Wiring django with ggml llama-2 model

FIRST... WHY?

TO SHOW THE SIMPLICITY OF BUILDING A WEBSERVER USING DJANGO, LARGE LANGUAGE MODEL & SUPPORTING LIBRARIES

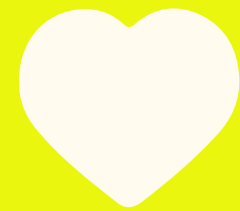

OKAY... HOW?

- START WITH A PAGE THAT CAN SEND A GET REQUEST TO THE SERVER
- CREATE THE VIEWS FUNCTION FOR PROCESSING THE GET REQUEST AND RETURNING THE REPLY
- USE THE DTL VARIABLES TO POPULATE BOTH QUERY AND LLM REPLY TO THE WEBPAGE

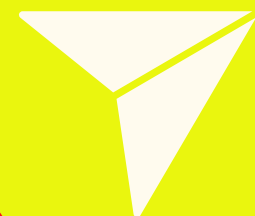

HMM... WHAT IT TAKES?

- TWO FUNCTION IN VIEWS.PY
- NEW HTML BODY THAT ACCEPTS QUERY AND REPLY
- AND... A GOOD PROCESSOR WITH **ATLEAST 16GB OF RAM**

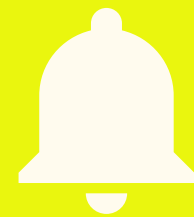

THANKS FOR WATCHING
